The Tulip Planter is equipped with a water basin and gauge to make it easier for you to grow beautiful, healthy plants that have all the nourishment they need. All you need to do is keep an eye on the floating leaf. If the floating leaf sinks to its minimum height, you should wait several days and then water the plants. The precise number of days you wait depends on the type of plant and growing environment.

- If the red part of the floating leaf is visible, there is no need to water the plants.

Le pot de fleurs tulipes est équipé d'un réservoir d'eau et d'une jauge pour vous aider à cultiver de belles plantes saines qui reçoivent tous les nutriments dont elles ont besoin. Il vous suffit de surveiller le flotteur en forme de feuille. Si celui-ci atteint son niveau minimum, veuillez attendre plusieurs jours avant d'arroser les plantes. Le nombre de jours dépend du type de plantes et de leur milieu de culture.

- Si la partie rouge du flotteur est visible, les plantes n'ont pas besoin d'être arrosées.

La Maceta Tulipán está equipada con un depósito de agua y medidor para que le sea más fácil cultivar plantas bellas y sanas que dispongan de toda la nutrición que necesiten. Sólo necesita vigilar la hoja flotante. Si la hoja flotante se hunde hasta su altura mínima, entonces debe esperar unos días para regar las plantas. El número exacto de días que debe esperar dependerá del tipo de planta y del entorno de cultivo.

- Si se puede ver la parte roja de la hoja flotante, no hace falta regar las plantas.

Der Pflanzkasten mit Rankgitter ist mit einem Wasserbecken und einer Anzeige ausgestattet um Ihnen das Aufziehen schöner, gesunder und optimal versorgter Pflanzen zu erleichtern. Sie müssen lediglich auf das Schwimmerblatt achten. Ist das Schwimmerblatt auf den niedrigsten Stand abgesunken, sollten Sie einige Tage abwarten und dann die Pflanzen gießen. Wie viele Tage Sie abwarten sollten, hängt von der Pflanzenart und den Wachstumsbedingungen ab.

- Sobald das rote Teil des Schwimmerblatts sichtbar wird, brauchen die Pflanzen nicht mehr gegossen zu werden.

De tulpen bloempot is voorzien van een waterbassin en een meter om het voor u gemakkelijker te maken prachtige, gezonde planten te verzorgen, die alle voeding krijgen die zij nodig hebben. U hoeft alleen op de vlotter te letten. Als de vlotter tot de minimale hoogte zinkt, moet u enkele dagen wachten en dan de planten water geven. Het exacte aantal dagen dat u moet wachten is afhankelijk van het type plant en de groeiomgeving.

- Als het rode gedeelte van de vlotter zichtbaar is, hebben de planten nog geen water nodig.

La Fioriera per tulipani è dotata di una vaschetta per l'acqua e di un indicatore che ti consentono di coltivare piante belle e sane, fornendo loro tutto il nutrimento di cui hanno bisogno. Tutto quello che devi fare è tenere d'occhio la foglia galleggiante; se quest'ultima scende alla sua altezza minima, devi aspettare alcuni giorni e poi innaffiare le piante. Il numero esatto di giorni da attendere dipende dal tipo di pianta e dall'ambiente di coltivazione.

- Se la parte rossa della foglia galleggiante è visibile, non è necessario innaffiare le piante.

A Jardineira para Tulipas é equipada com um recipiente para água e um medidor para facilitar o cultivo de plantas lindas e saudáveis, com todos os nutrientes de que necessitam. Tudo o que precisa fazer é ficar de olho na folha flutuante. Se a folha flutuante afundar até a altura mínima, será preciso aguardar por vários dias e só então regar as plantas. O número exato de dias de espera dependem do tipo de planta e do ambiente de crescimento.

- Se a parte vermelha da folha flutuante estiver visível, não é preciso regar as plantas.

- It is recommended to occasionally pull out the drainage cap in order to drain excess water and keep the roots healthy.
- It is often a good idea to recycle drainage water from the Tulip Planter by using it to water other plants, as it is rich in natural salts and minerals. This helps to conserve water and contribute to a more environmentally-friendly garden.

• Nous vous recommandons d'ouvrir de temps en temps le bouchon de drainage afin d'évacuer l'excès d'eau et de garder les racines en bonne santé.

• Nous vous recommandons de recycler l'eau drainée du pot de fleurs tulipes et de l'utiliser pour arroser d'autres plantes, car elle est riche en sels et minéraux naturels. Vous économisez ainsi de l'eau et contribuez à un jardin plus respectueux de l'environnement.

- Se recomienda extraer de vez en cuando el tapón de drenaje para drenar el exceso de agua y mantener las raíces sanas.
- A menudo, es una buena idea reciclar el agua drenada de la Maceta Tulipán reutilizándola para regar otras plantas, ya que es rica en sales y minerales naturales. Esto ayuda a ahorrar agua y a tener un jardín más respetuoso con el medio ambiente.

• Es wird empfohlen gelegentlich durch Herausnehmen des Ablaufstopfens, überschüssiges Wasser ablaufen zu lassen, damit die Wurzeln gesund bleiben.
• Verwenden Sie das abgelassene Wasser von Ihrem Pflanzkasten mit Rankgitter zum Gießen von anderen Pflanzen, da es reich an natürlichen Salzen und Mineralien ist. Somit können Sie Wasser sparen und sich an einem umweltfreundlichen Garten erfreuen.

- Het wordt aangeraden om af en toe de afvoerdop te verwijderen om overmatig water af te voeren en de wortels gezond te houden.
- Het is vaak een goed idee om afvoerwater van de tulpen bloempot te recyclen voor het bewateren van andere planten te gebruiken. Het is namelijk rijk aan natuurlijke zouten en mineralen. Dit helpt water te besparen en de tuin milieuvriendelijk te houden.

Si consiglia di estrarre occasionalmente il tappo di drenaggio per far defluire l'acqua in eccesso e mantenere le radici sane.

• Spesso è una buona idea riciclare l'acqua di drenaggio della Fioriera per tulipani utilizzandola per innaffiare altre piante, poiché è ricca di sali e minerali naturali. Ciò contribuisce a risparmiare acqua e a rendere il giardino più ecologico.

Recomenda-se a retirada periódica da capa de drenagem para escoar o excesso de água e manter as raízes saudáveis.

Costuma ser uma boa ideia reciclar a água de drenagem da Jardineira para Tulipas utilizando-a para regar outras plantas, uma vez que é rica em sais e minerais naturais, o que ajuda a conservar a água e contribui para que o seu jardim seja mais ecologicamente correto.
